EXPERIENCE
IQVIA, Warren, NJ   **April 2015 – July 2019**

Software Engineer II
Front-end developer for the graphical user interface for Mobile Intelligence updates.

- Designed and developed innovative UI and services for proprietary applications.
- Worked on a highly Agile, engaged and motivated development team.
- Participated in all stages of development life cycles.
- Responsible for maintenance of applications with technologies such as HTML, SCSS, JavaScript, Material-UI, React, Typescript, Photoshop, Sketch, and Zeplin.
- Performed code review of other team members.
- Researched new technologies, identified and learned best practices, adapted quickly and provided technical guidance to other team members.
- Collaborated with leadership to implement codes that were lighter and cleaner.
- Managed multiple bug issues and site improvements that were tracked using JIRA Bug Tracking system.

CVS Health, Florham Park, NJ   **August 2014 – March 2015**
UI Developer
Front-end developer with a designers eye and understands the user experience who will develop the prototype website for business.

- Updated and maintained mobile interfaces using technologies such as HTML 5, CSS 3, LESS, JavaScript, and AngularJS.
- Participated in adding new feature – Buy Online, Pick Up in Store (BOPUS) to CVS mobile app.
- Worked on a mini prototype demo for CVS Caremark Specialty.

- Created multiple images in different sizes to cater to all mobile devices using Illustrator and Photoshop.
- Created a demo site that mimicked the CVS Caremark desktop version.

Sotheby's, New York, NY   **August 2004 – January 2014**
Application Engineer
Developer responsible for designing, developing and implementing programs and applications.

- Updated and maintained websites using HTML, CSS, and JavaScript completing tasks in an agile environment, ahead of time and ensuring efficiency.
- Assisted in the implementation and testing of Adobe CQ Content Management System (CMS) as well as made the website responsive using frameworks such as Bootstrap.
- Developed editable components for CMS so producers can work more productively and keep Sotheby's website maintained.
- Developed an iPad app for Sotheby's Catalogue using Adobe Digital Publishing Suite (DPS), XML, JSON, HTML 5 and CSS 3 technologies.
- Also, worked on multiple bug issues and site improvements that were tracked using JIRA Bug Tracking system.
